

# Saskatchewan Mathematics Teachers' Society

Dear School Community Councils,

The Saskatchewan Mathematics Teachers' Society (SMTS) is very excited to support, partner and work alongside schools and School Community Councils (SCC) in your efforts to organize a Math Night in your respective school and community.

Thanks to the generous grant from the Saskatchewan Teachers Federation the SMTS can support math nights across the province throughout the 2021/2022 school year. We know that every school and community is different and so will math nights which is why we will work with schools to ensure your math night is a success!

The SMTS can provide the following:

- A large selection (K-9) of engaging math games, activities, and tasks to engage families in a variety of mathematical concepts.
- An SMTS executive member to help organize, set up and facilitate an information session for parents.
- Access to manipulatives and items for math take home goodie bags for purchase.

Ways the SCC could help make the math night a success:

- Volunteer to help with the setup and welcome families as they arrive.
- Organize some type of food or beverage.
- Secure funding for goodie bags (if desired).
- Promote the evening throughout the community.

We look forward to working with your community as we engage families in the beauty of mathematics.

Sincerely,

Chad Williams  
President of the SMTS
